Hello everybody,

following to my letters from yesterday, I have got one question from France:

Svein Erik Teslo writes in his report that latest 2036 the Arena will be closed. So somebody could have the idea that we have ten years left to fight.

This is wrong!

As a matter of fact, there is a verdict from the court that overnight parking is completely forbidden from now on. The club needs the money to run the Arena!

I heard that the club started to sell gear like snow mobiles in order to cover the expenses for the law suit.

The parking area is reduced to a quarter or the fifth part of the parking area as we know it. To make any fences around the cars/ trucks will be not possible, and only a few teams can park there at the same time.

This means severe restrictions for the number of teams and for the quality of the trails.

Moreover – I know this from talking to the Board members of HTK – our Norwegian friends start to get tired from fighting.

Summary: We do not have 10 years. We have to support them NOW.

Best regards

Detlef Oyen

Vicepresident VDSV

Direktor Sport VDSV
